Let's Make a Fall Garland

Pumpkin ▪ Fallen Leaf ▪ Maple Leaf

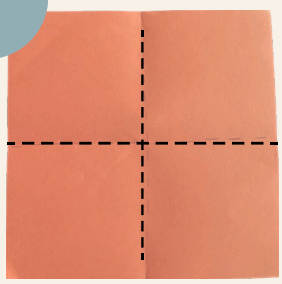

Fold your pieces, string them together, and bring a little autumn home.

Again Soon

Again Soon

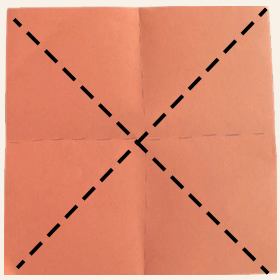

Let's Make a Pumpkin

1

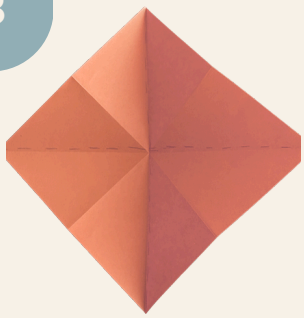

Fold in half vertically and horizontally, unfolding after each fold.

2

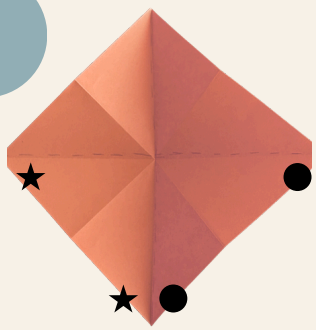

Flip over. Fold diagonally in both directions, unfolding each time.

3

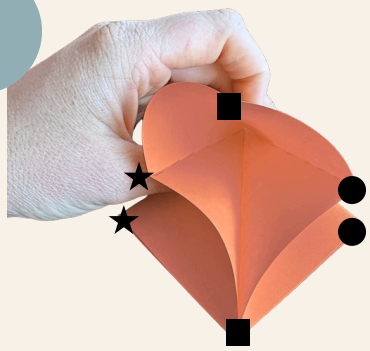

Flip back over and rotate into a diamond.

4

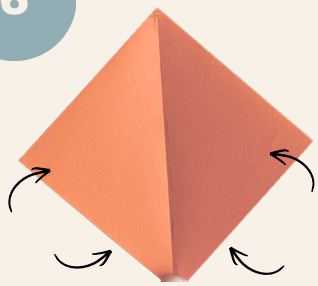

Bring the marked corners down to their matching points.

5

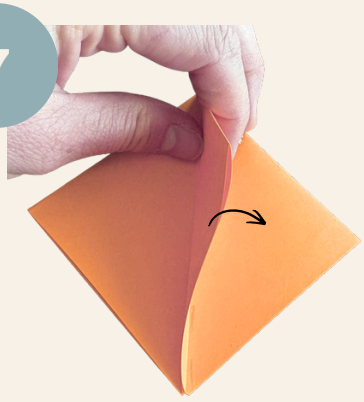

Flatten the top pocket, matching the marked points to form a square.

6

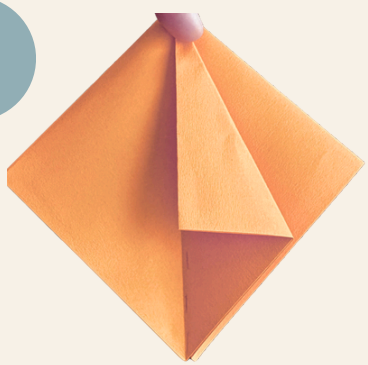

Check! You should have an upper and lower flap on both the left and right, with the open edges facing down.

7

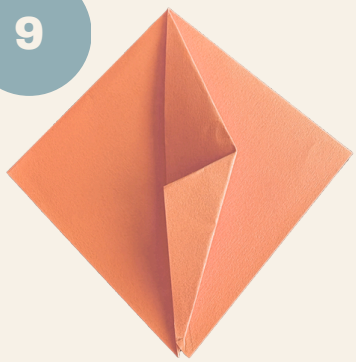

Lift up the left-upper flap and flip to the right, like a book page.

8

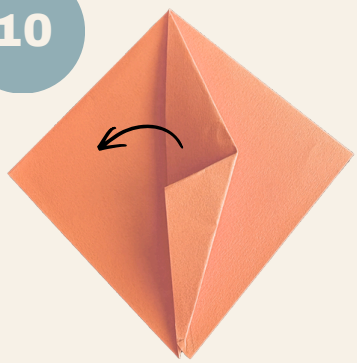

Fold the flap's upper-right corner to the middle crease.

9

Fold the flap's lower-right corner to the center crease too.

10

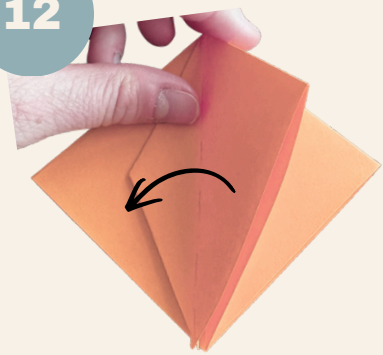

Flip this new mini flap back to the left, like a book page.

11

Flatten. **Check!** Your paper should look like this.

12

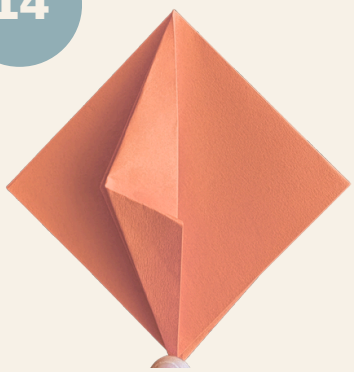

Flip the right-upper flap to the left, like a book page.

13

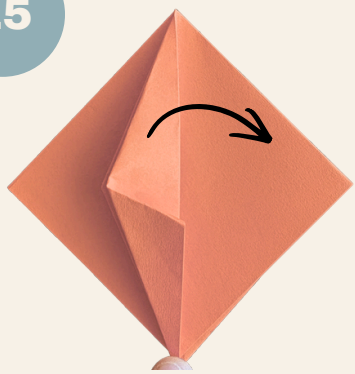

Check! Your paper should look like this.

14

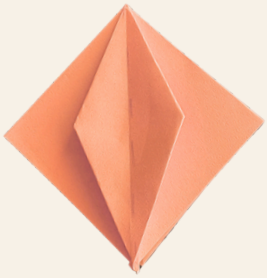

Fold the upper-left corner to the center crease. Repeat with lower-left corner. (Hint: same as Steps 8-9 on other side.)

15

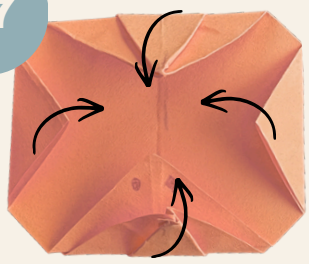

Flip mini flap to the right, lilke flipping a book page.

16

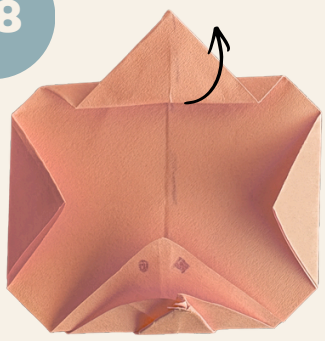

Check: Should look like this. Flip over!

17

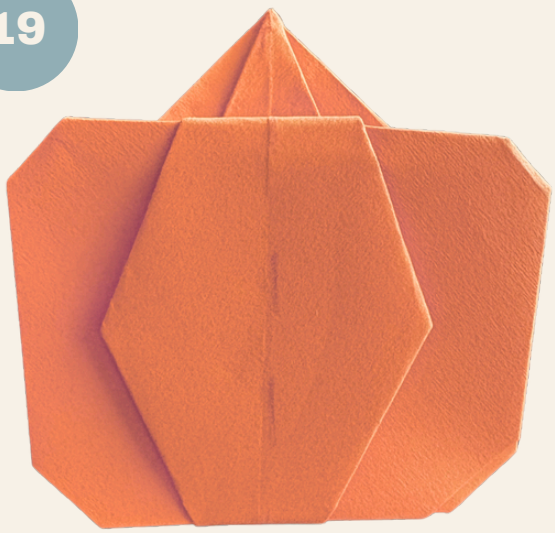

Fold all 4 corners towards the center. Make the top fold slightly larger to create your stem!

18

Fold back part of the top triangle to reveal the stem on the other side.

19

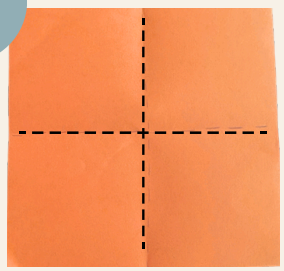

Flip over - you're done!

Again Soon

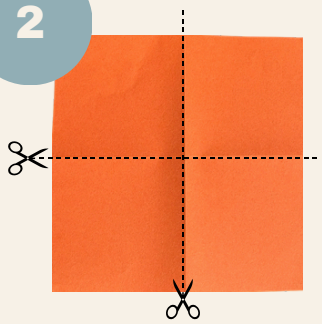

Let's Make a Fallen Leaf

1

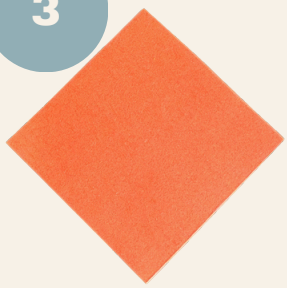

Fold in half vertically and horizontally, unfolding after each fold.

2

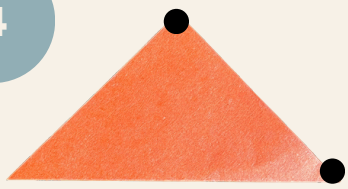

Cut along both creases to create 4 smaller squares.

3

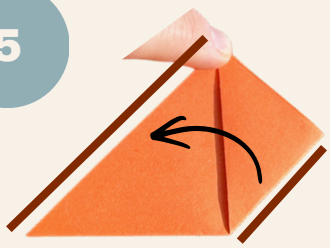

Take 1 square and rotate it into a diamond. Fold the bottom point to the top point.

4

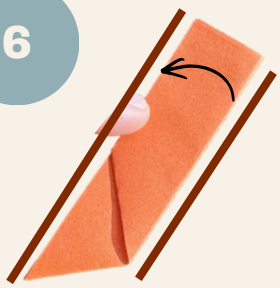

Fold the bottom-right corner up to meet the top point.

5

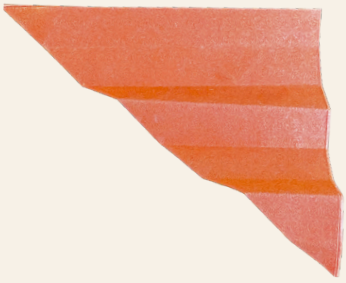

Fold the lower slanted edge up to meet the upper edge. Keep the layers aligned and flatten.

6

Repeat that fold once more. Flatten.

7

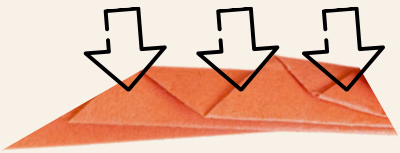

Unfold the last three folds to reveal your triangle again.

8

Starting at the bottom, accordion-fold along the existing creases, like a paper fan.

9

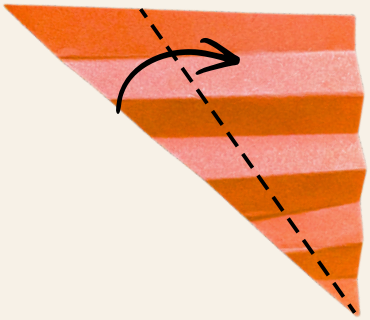

Pinch the fan together and press firmly to sharpen the creases.

10

Open the triangle again. Your creases should now be more defined!

11

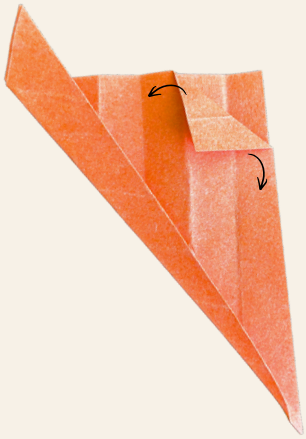

Fold along the dotted line and crease firmly.

12

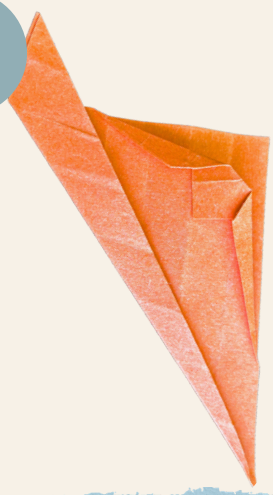

Fold only the top flap backward, matching marked corner to matching shape.

13

Fold both corners of the small triangle inward slightly to round your leaf.

14

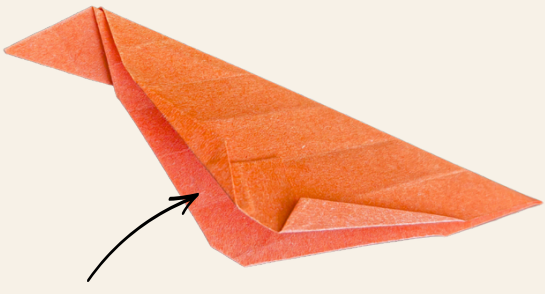

Check! Your paper should look like this.

15

Flip the entire leaf over, and repeat steps 12 & 13.

16

Gently open between the two flaps to reveal your leaf!

17

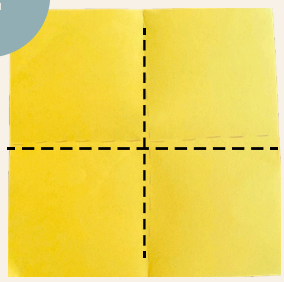

You're done!

Again Soon

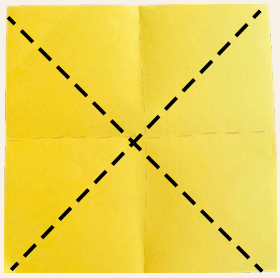

Let's Make a Maple Leaf

1

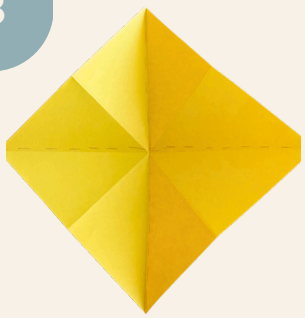

Fold in half vertically and horizontally, unfolding after each fold.

2

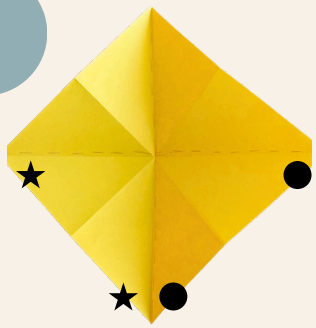

Flip over. Fold diagonally in both directions, unfolding each time.

3

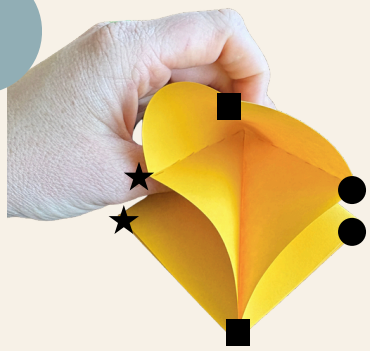

Flip back over and rotate into a diamond.

4

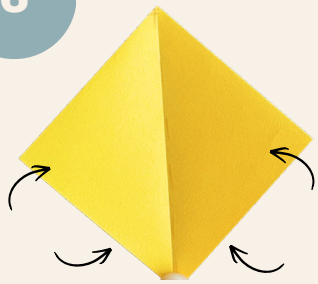

Bring the marked corners down to their matching points.

5

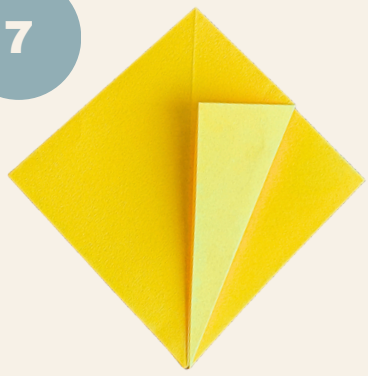

Flatten the top pocket, matching the marked points to form a square.

6

Check! You should have an upper and lower flap on both the left and right, with the open edges facing down.

7

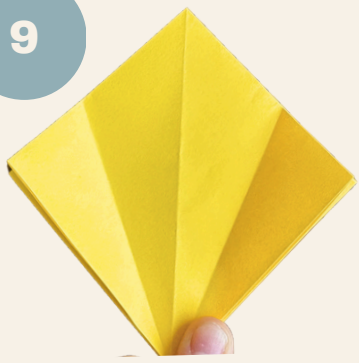

Fold the lower-right corner to the center crease.

8

Repeat Step 7 on the left side.

9

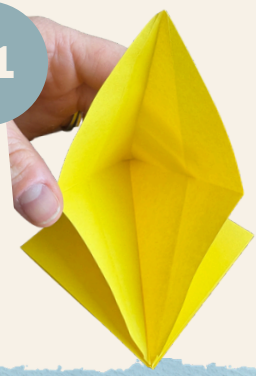

Unfold the last two folds to return to your diamond shape.

10

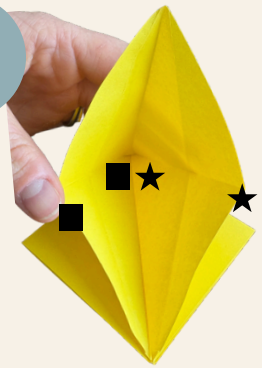

Open up the top flap, using one finger to hold down the bottom and one to open the top.

11

Check! You should have a pocket like this. We are now going to flatten it into a diamond.

12

Fold the two bottom outer triangles inward so they lie flat, matching the marked shapes above.

13

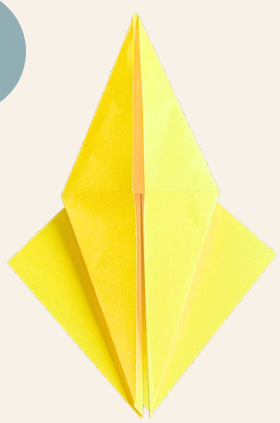

Check! Your paper should look like this.

14

Flatten the top triangles by gently pushing the two sides backward.

15

Check! Paper should look like this.

16

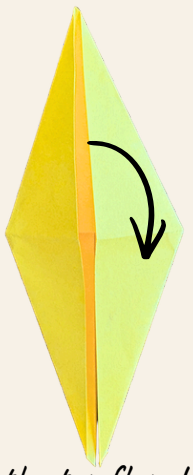

Flip leaf over to back.

17

Repeat steps 7-15 on this side. When finished, it should look like this.

18

Fold the top flap down along existing crease.

19

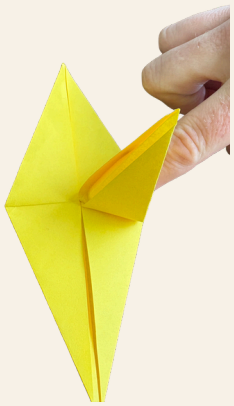

Check! Paper should look like this.

20

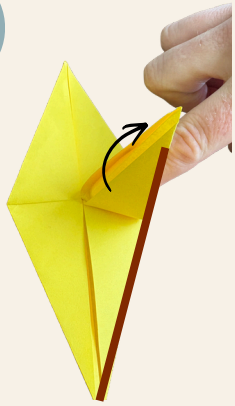

Flip over.
Lift the top right flap up to 90°

21

Using your finger, open up the pocket on the outer side of this flap.

22

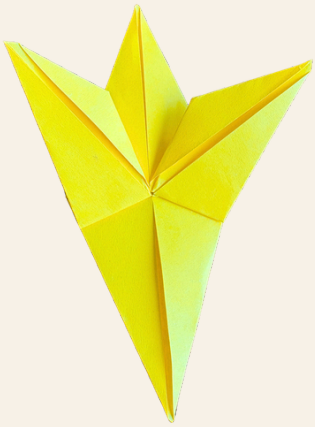

Flatten the pocket so its left edge aligns with the right side of the diamond (as shown by the red line above.)

23

Check! Paper should look like this.

24

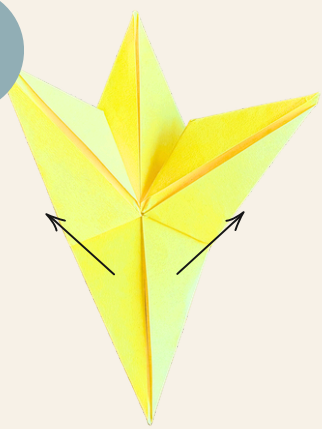

Repeat steps 11-13 with the upper-left flap. When finished, it should look like this.

25

Cut along the line above to separate the two bottom flaps.

26

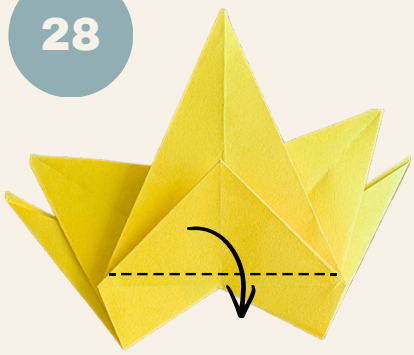

Fold the lower-right flap back and to the right.
Repeat on the left side.

27

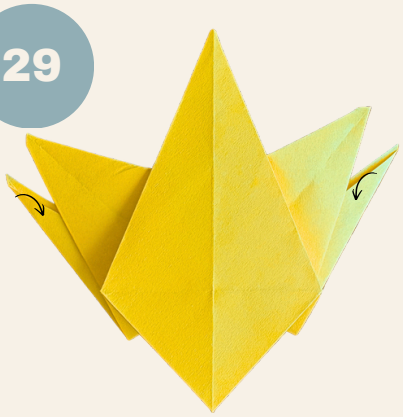

The front of your leaf is complete!

28

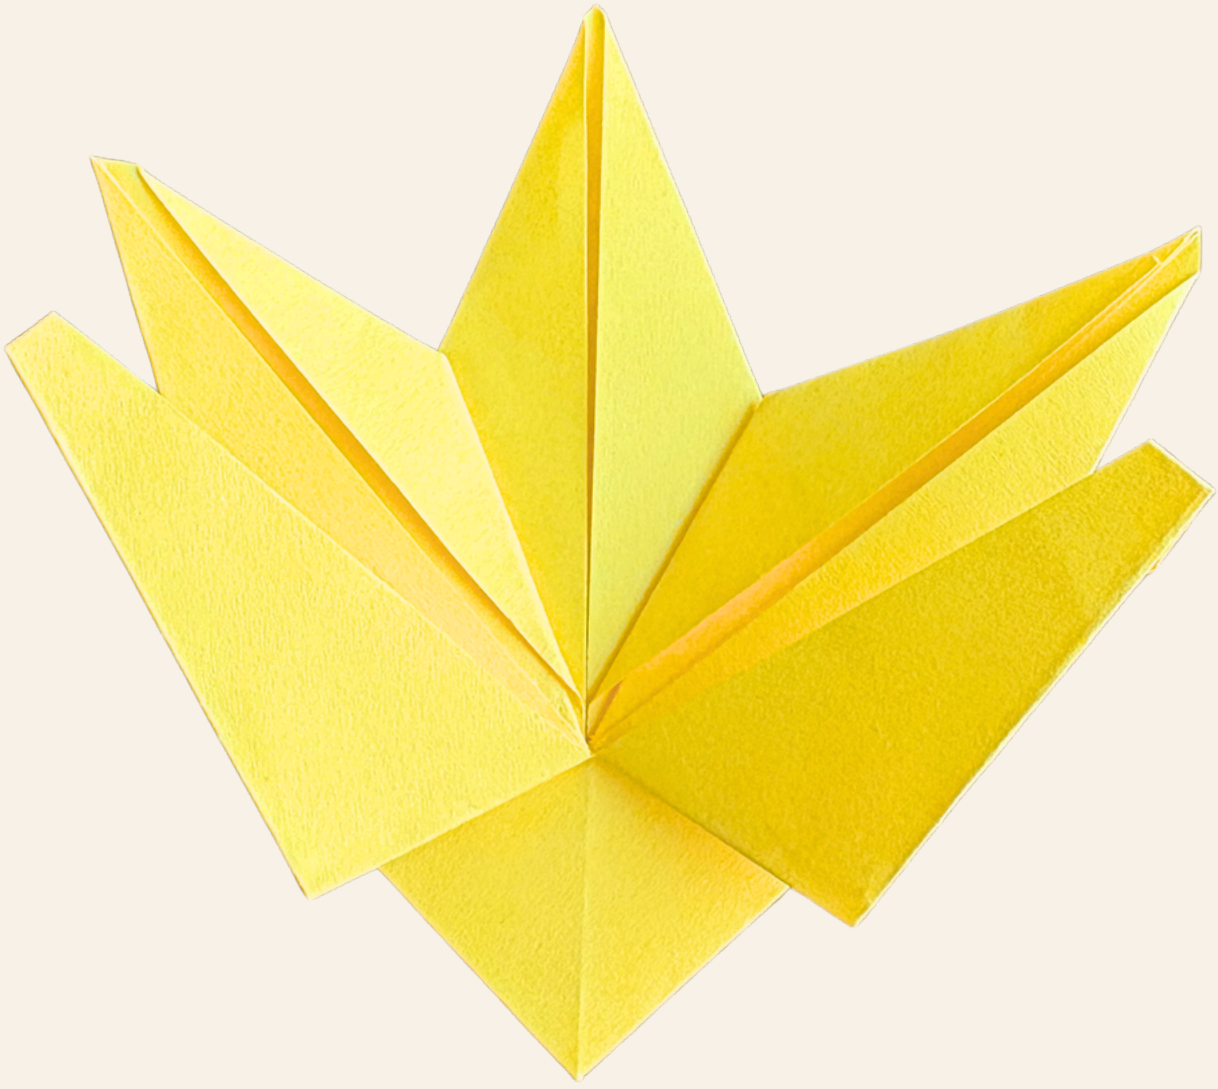

Flip to the back. Fold the smaller lower triangle backward and down along the existing crease.

29

If desired, fold back the bottom leaf tips to make them less pointy.

30

You're done!

Let's Assemble the Garland

Using the provided hole punch, punch two holes in every shape you've made.

Thread the twine from front-to-back in one hole, and then back-to-front in the other. Continue until your garland is complete!
